

V.V. FLAMBAUM, PUBLICATIONS

Book chapter

S. Karshenboim, V.V Flambaum, E. Peik, "Atomic clocks and constraints on variation of fundamental constants," in *Springer Handbook of Atomic, Molecular and Optical Physics*, edited by G.W.F. Drake, Springer, Berlin, 2005, Ch. 30, pp455-463; arXiv:physics/0410074.

Refereed journal papers

1. Single muon production in electron-positron collisions. O.P. Sushkov, V.V.Flambaum. *Yad. Fiz. (Sov.J. Nucl. Phys.)* 18(1), 159, 1973.
2. Spin effects in elastic muon-nucleus scattering. V.V. Flambaum. *Yad. Fiz.* 20(5), 1024, 1974.
3. Tests of renormalizable models of weak interactions in e^+e^- -collisions. O.P. Sushkov, V.V. Flambaum, I.B. Khriplovich, *Yad. Fiz.* 20(5), 1016, 1974.
4. Weak interaction effects in electron-nucleon scattering. V.V.Flambaum. *Yad. Fiz.* 22(2), 338, 1975.
5. $K_L - 2\mu$ and $K - \pi\nu\nu$ decays in Weinberg model. V.V. Flambaum. *Yad. Fiz.* 22(3), 661, 1975.
6. Electron electric dipole moment enhancement in heavy atoms. V.V.Flambaum. *Yad. Fiz.* 24(2), 383, 1976.
7. Parity nonconservation in strongly forbidden M1-transitions in thallium and lead. O.P. Sushkov, V.V. Flambaum, I.B. Khriplovich, *JETP. Lett* 24, 461, 1976. *Pis'ma ZhETF* 24, 502 (1976).
8. Radial integrals, oscillator strengths and polarizabilities of thallium, lead and bismuth atoms. V.V. Flambaum, O.P. Sushkov. *J. Quant. Spectr., Rad. Transfer* 20, 569, 1978.
9. Possibility to investigate weak neutral current structure in optical transition of heavy atoms. V.N. Novikov, O.P.Sushkov, V.V. Flambaum, I.B. Khriplovich, *JETP* 46, 420, 1977, *ZhETF* 73, 802, 1977.
10. To the theory of heavy atom hypertine structure. O.P. Sushkov, V.V. Flambaum, I.B. Khriplovich,. *Opt. Spectr.* 44, 3, 1978. (*Sov. Opt. Spectr.* 44, 2 (1978)).
11. Nature of strongly forbidden M1-transitions and of g-factor anomalies in heavy atoms. V.V. Flambaum, I.B. Khriplovich, O.P. Sushkov. *Phys. Lett.* A67(3), 177, 1978.
12. Strongly forbidden M1-transition and g-factor anomalies. V.V.Flambaum, I.B. Khriplovich, O.P. Sushkov. *JETP* 48 (2), 37-40, 1978.
13. Thallium tensor polarizability. Yu.I.Skovpen, V.V. Flambaum. *Opt. Spectr.* 45(5), 851, 1978. (*Sov. Opt. Spectr.* 45 (5), 731 (1978)).
14. Optical activity of thallium and lead vapour near suppressed M1-transitions. V.V. Flambaum, I.B. Khriplovich, O.P. Sushkov. *ZhETF (JETP)* 74, 868, 1978.
15. Parily nonconservation in heavy atoms due to weak electron-electron interaction. O.P. Sushkov, V.V. Flambaum. *Yad. Fiz.* 27, 1307, 1978.
16. * Effects of parity nonconservation in diatomic molecules. O.P. Sushkov, V.V.Flambaum. *JETP* 48, 608-611, 1978 (*ZhETF* 75(10), 1208, 1978).
17. Possible mechanism of parity nonconservation in nuclear fission, O.P. Sushkov, V.V.Flambaum. *Yad. Fiz.* 31(1), 55, 1980.
18. Mechanism of parity nonconservation in nuclear fission, V.V. Flambaum, O.P. Sushkov. *Phys. Lett.* B94(3), 277, 1980.
19. Nature of parity nonconservation in nuclear fission. O.P. Sushkov, V.V. Flambaum. *Yad. Fiz.* 33(1), 59, 1981. *Sov. J. Nucl. Phys.* 33, 31 (1981).

20. * P-odd nuclear forces as a source of parity nonconservation in atoms. V.V. Flambaum, I.B. Khriplovich. ZhETF 79, 1656, 1980. JETP 52, 835-839 (1980).
21. * On the possibility to observe parity nonconservation in neutron optics. O.P. Sushkov, V.V. Flambaum. Pis'ma ZhETF 32(5), 377, 1980. JETP Letters 32, 352-354 (1980). Preprint INP 80-148 (1980).
22. Angular correlations in the fission of nuclei by slow neutrons. O.P. Sushkov, V.V. Flambaum, Yad. Fiz. 33(3), 629, 1981. Sov. J. Nucl. Phys. 33, 329 (1981).
23. Neutron spin rotation and other parity nonconservation effects in Sn. V.V. Flambaum, O.P. Sushkov. Preprint INP 81-37, 1981.
24. Semiclassic behaviour of Hartree-Fock orbitals at large distances. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, J.Phys.B. 15, 575, 1982.
25. Relativistic many body calculations of energy levels and fine structure intervals for Caesium. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. J. Phys. B16, 715-722, 1983.
26. Francium energy levels. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. Phys. Lett. A95, 230, 1983.
27. Parity nonconserving neutron spin rotation in helium. V.F. Dmitriev, V.V. Flambaum, O.P. Sushkov, V.B. Telitsyn. Phys. Lett. B125(1), 1-4, 1983.
28. * Theory of neutron reactions and weak interaction in heavy nuclei. V.V. Flambaum, O.P. Sushkov. Nucl. Phys. A412, 13-33, 1984.
29. Parity nonconservation in neutron capture by ^{233}U . V.V. Flambaum, O.P. Sushkov. Preprint INP 83-31, 1983.
30. Computer code for relativistic many body atomic calculations. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. Preprint INP 82-89, 1982.
31. Relativistic many body calculations for Cs atom. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. 8 ICAP, A28, B27, 1982.
32. Angular and polarizatron correlations in (n, γ) reaction. V.V. Flambaum, O.P. Sushkov. Nucl. Phys. A435(2), 352, 1985.
33. Relativistic many body calculations of hyperfine structure intervals for caesium and francium. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. J. Phys. B17, 1953, 1984.
34. * On the possibility of investigation of P- and T-odd nuclear forces in atomic and molecular experiments. O.P. Sushkov, V.V. Flambaum, I.B. Khriplovich. JETP 60(5), 873, 1984; ZhETF 87(5), 1521, 1984.
35. Odd Harmonics in the angular distribution of fission fragments. V.V. Flambaum. Yad. Fiz. 42(3), 578, 1985.
36. * Nuclear anapole moments. V.V. Flambaum, I.B. Khriplovich, O.P. Sushkov. Phys. Lett. B. 146(6), 367, 1984.
37. G-factor anomalies in heavy atoms. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. Physica Scripta 31, 275, 1985.
38. Relativistic many body calculations of parity nonconserving E1-amplitude in caesium. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. Phys. Lett. A. 103(5), 265, 1984.
39. Relativistic many body calculations in atoms and parity nonconservation in caesium. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. J.Phys. B18, 597, 1985.
40. Limits on electric dipole moments and T-violating weak interactions of nucleons. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov. Phys. Lett. B 154(2), 93, 1985.

41. Parity nonconservation in proton-helium scattering. V.V. Flambaum, O.P. Sushkov, V.B. Telitsyn. Nucl. Phys. A 444(4), 611, 1985.
42. Enhancement of parity violating effects in diatomic molecules. V.V. Flambaum, I.B. Khriplovich. Phys. Lett. A. 110(3), 121, 1985.
43. Limit on the constant of T-odd nucleon-nucleon interaction. V.V. Flambaum, I.B. Khriplovich, O.P. Sushkov. Phys. Lett. B 162(4), 213, 1985.
44. Hyperfine structure of Ra+ and magnetic moments of Ra isotopes. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. Physica Scripta 32, 507, 1985.
45. New limits on electron electric dipole moment and T-odd electron-nucleon interactions. V.V. Flambaum, I.B. Khriplovich. ZhETF 89(5), 1505, 1985. Sov. Phys. JETP 62, 872 (1985).
46. * On the P- and T-nonconserving nuclear moments, V.V. Flambaum, I.B. Khriplovich, O.P. Sushkov. Nucl. Phys. A 449(4), 750-760, 1986.
47. Enhancement of P- and T- nonconserving effects in rare-earth atoms. V.A.Dzuba, V.V. Flambaum, I.B. Khriplovich. Z. Phys. D1, 243, 1986.
48. Shielding of external electric field in atoms. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. Phys. Lett. A 118(4), 177, 1986.
49. Correlation potential method. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. J. Phys. B20, 1399-1412, 1987.
50. Parity nonconservation in thallium and cesium. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. Physica Scripta 36(1), 69-70, 1987.
51. * Calculation of parity nonconservation in thallium. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. J. Phys. B 20(4), 3297-3311, 1987.
52. Relativistic many body calculations of parity nonconservation in lead and bismuth atoms. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. Europhys. Lett. 7(5), 413-418, 1988.
53. Screening of Coulomb interaction and many body perturbation theory in atoms. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, O.P. Sushkov. Phys. Lett. A 131 (7,8), 461-465, 1988.
54. On e^+e^- pair production in heavy ion collisions through discharge in the electron gas of the united atom. J.M. Bang, V.V. Flambaum, J.M. Hansteen. Z. Phys. A 330, 431-432, 1988.
55. On the electronic structure of high - T_c superconductors. Undoped CuO_2 - plane. V.V. Flambaum, O.P. Sushkov. Physica C.159, 586-594, 1989.
56. On the electronic structure of high - T_c superconductors. Nature of charge carriers. V.V. Flambaum, O.P. Sushkov. Physica C.159, 595-602, 1989.
57. Frequencies of nuclear resonances for copper and electronic wave function of antiferromagnetic La_2CuO_4 . Physica C.168, 565, 1990.
58. Summation of the high orders of perturbation theory in the correlation correction to the hyperfine structure and to the amplitudes of E1 - transitions in caesium atom. V.A. Dzuba, V.V. Flambaum, A.Ya.Kraftmakher, O.P. Sushkov. Phys. Lett. A 142 (6,7), 373, 1989.
59. Summation of the high orders of perturbation theory in the correlation correction to energy levels of the caesium atom, V.A. Dzuba, V.V. Flambaum, O.P. Sushkov, Phys. Lett. A 140(9), 493-497, 1989.
60. * Summation of the high orders of perturbation theory for the parity non-conserving E1 - amplitude of the 6s - 7s transition in the caesium atom, V.A. Dzuba, V.V. Flambaum, O.P. Sushkov, Phys. Lett. A 141 (3,4), 147-153, 1989.

61. Many-body perturbation theory and precise calculation of parity nonconservation in Caesium. V.A. Dzuba, O.P. Sushkov, and V.V. Flambaum. Physics Reports of High Educational Institutes of USSR (Soviet Physics Journal) 33,108-119,1990.
62. Electronic structure of high- T_c superconductors. V. V. Flambaum and O. P. Sushkov, Physica C **175**, 347 (1991).
63. Fine structure of the alkaline earth negative ions. V. A. Dzuba, V. V. Flambaum, G. F. Gribakin, and O. P. Sushkov, Phys. Rev. A **44**, 2823 (1991).
64. Resonance enhancement of relativistic effects for the scattering of very slow electrons on heavy atoms. V. A. Dzuba, V. V. Flambaum, and O. P. Sushkov, Phys. Rev. A **44**, 4224 (1991).
65. Many body perturbation theory calculations in heavy atoms with open shells. V. A. Dzuba, V. V. Flambaum, P. G. Silvestrov, and O. P. Sushkov, Phys. Rev. A **44**, 2828 (1991).
66. The hole dispersion and the enhancement of the antiferromagnetic interaction in the high- T_c superconductors. V. V. Flambaum and O. P. Sushkov, Physica C **190**, 453 (1992).
67. Long-range parity nonconserving interaction. V.V.Flambaum. Phys. Rev. A **45**, 6174 (1992).
68. Regular mechanism of parity and time invariance non-conserving effects enhancement in neutron capture and scattering near p -wave compound resonance. V. V. Flambaum, Phys. Rev. C **45**, 437 (1992).
69. The possibility to observe parity nonconservation and to measure the nuclear anapole moment using the NMR frequency shift in a laser beam. V. V. Flambaum and O. P. Sushkov, Phys. Rev. A **47**, R751 (1993).
70. * Dynamical enhancement of weak interactions and Quantum Chaos. V. V. Flambaum, Physica Scripta **46**, 198-207 (1993).
71. Interaction between slow positrons and atoms. V. A. Dzuba, V. V. Flambaum, W. A. King, B. Miller, and O. P. Sushkov, Physica Scripta **46**, 248-251 (1993).
72. $t - J$ model. Instability of the magnetic order and of the Fermi surface under doping. O. P. Sushkov and V. V. Flambaum, Physica C (Superconductivity) **206**, 269 (1993).
73. Calculation of the scattering length in atomic collisions using the semiclassical approximation. G. F. Gribakin and V. V. Flambaum, Phys. Rev. A **48**, 546-553 (1993).
74. * Matrix elements between compound states and dynamical enhancement of weak interaction. V. V. Flambaum and O. K. Vorov, Phys. Rev. Lett. **70**, 4051-4055 (1993).
75. Magnetic interaction between relativistic atomic electrons and parity non-conserving nuclear moments. V. V. Flambaum and C. Hanhart. Phys. Rev. C **48**, 1329-1334 (1993).
76. The hole-hole superconducting pairing in $t - J$ model induced by the long-range spin-wave exchange. V. V. Flambaum, M. Yu. Kuchiev and O. P. Sushkov, Physica C **227**, 267-278 (1994). Physica C **235**, 2217-2218 (1994).
77. * Spin hedgehog and collective magnetic quadrupole moments induced by parity and time invariance violating interaction. V. V. Flambaum, Phys. Lett. B **320**, 211-215 (1994).
78. * The structure of compound states in the “chaotic” spectrum of Ce atom: localization properties, matrix elements, and enhancement of weak perturbations. V. V. Flambaum, A. A. Gribakina, G. F. Gribakin, and M. G. Kozlov, Phys. Rev. A **50**, 267-296 (1994).
79. Renormalization of the P - and T -odd nuclear potentials by the strong interaction and enhancement of P -odd effective field. V. V. Flambaum and O. K. Vorov, Phys. Rev. C **49**, 1827-1831 (1994).
80. Calculation of the weak interactions in Dysprosium. V. A. Dzuba, V. V. Flambaum, and M. G. Kozlov, Phys. Rev. A **50**, 3812-3817 (1994).

81. * Random-sign observables nonvanishing upon averaging: enhancement of weak perturbations and parity nonconservation in compound nucleus. V. V. Flambaum, G. F. Gribakin, Phys. Rev. C **50**, 3122-3134 (1994).
82. Induced parity nonconserving interaction and enhancement of two-nucleon parity nonconserving forces. V. V. Flambaum and O. K. Vorov, Phys. Rev. C **51**, 1521-1527 (1995).
83. Bound states of positrons and neutral atoms. V. A. Dzuba, V. V. Flambaum, G. F. Gribakin, W. A. King, Phys. Rev. A **52**, 4541-4546 (1995).
84. * Calculation of energy levels, $E1$ transition amplitudes and parity violation in francium. V. A. Dzuba, V. V. Flambaum, and O. P. Sushkov, Phys. Rev. A **51**, 3454-3461 (1995).
85. Possible doublet mechanism for a regular component of parity violation in neutron scattering. V. V. Flambaum and V. G. Zelevinsky, Phys. Lett. B **350**, 8-12 (1995).
86. Band structure of the Hamiltonian matrix of a real "chaotic" system: The Ce atom. A. A. Gribakina, V. V. Flambaum, and G. F. Gribakin, Phys. Rev E **52**, 5667-5670 (1995).
87. Effects of P - and T -odd weak nucleon interaction in nuclei: renormalization due to residual strong interaction and matrix elements between compound states. V. V. Flambaum and O. K. Vorov, Phys Rev C **51**, 2914-2922 (1995).
88. * Correlations within eigenvectors and transition amplitudes in the two-body random interaction model. V. V. Flambaum, G. F. Gribakin, and F. M. Izrailev, Phys.Rev.E **53**,part A,5729-41(1996).
89. Manifestation of the nuclear anapole moment in the $M1$ transitions in Bismuth. M. G. Kozlov, S. G.Porsev, and V. V. Flambaum, J. Phys. B **29**, 689-697 (1996).
90. Towards a statistical theory of finite Fermi systems and compound states: random two-body interaction approach. V. V. Flambaum, F. M. Izrailev, and G. Casati, Phys. Rev. E **54**, 2136-2139 (1996).
91. Narrow compound autoionizing states in atomic spectra. V. V. Flambaum, A. A. Gribakina, and G. F. Gribakin, Phys. Rev. A, **54**, 2066-2079 (1996).
92. Calculations of energy levels for atoms with several valence electrons. V. A. Dzuba, V. V. Flambaum, and M. G. Kozlov. JETP Lett. **63**,882-887, (1996).
93. Combination of the many-body perturbation theory with the configuration interaction method. V. A. Dzuba, V. V. Flambaum, and M. G. Kozlov. Phys. Rev. A **54**, 3948-3959 (1996).
94. Many-body calculations of positron scattering from and annihilation in noble gases. V. A. Dzuba, V. V. Flambaum, G. F. Gribakin, and W. A. King, J. Phys. B **29**, 3151-3175 (1996).
95. Collective T - and P -odd electromagnetic moments in nuclei with octupole deformations. N. Auerbach, V. V. Flambaum, and V. Spevak, Phys. Rev. Lett. **76** (N 23), 4316-4319 (1996).
96. Structure of low-energy collective 0^- states in doubly magic nuclei and matrix elements of the P -odd and P -and T -odd weak interaction. O. Vorov, N. Auerbach and V. V. Flambaum, Phys. Lett.B **385**,17-24 (1996).
97. Core contribution to the nuclear magnetic quadrupole moment. V.F. Dmitriev, V.B. Telitsin, V.V. Flambaum, V.A. Dzuba. Phys. Rev. C **54**, 3305-3307 (1996).
98. Chaos, correlations and transition amplitudes in compound states. V. V. Flambaum, Proc. Int. Workshop "Parity and Time Reversal violation in compound nuclear states and related topics", Trento, 1995, pp.41-64 (Editors N. F. Auerbach, J.D.Bowman. World Scientific, 1996).
99. Distribution of occupation numbers in finite systems and role of interaction in chaos and thermalization. V.V. Flambaum, F.M. Izrailev, Phys. Rev. E **55**, R13-R16 (1997).
100. Limits on the monopole magnetic field from the measurements of electric dipole moments of atoms, molecules and the neutron. V. V. Flambaum and D. W. Murray, Phys. Rev. A **55**, 1736 (1997).

101. The anapole moment and nucleon weak interactions. V. V. Flambaum and D. W. Murray, Phys. Rev. C 56,1641-1644 (1997).
102. Enhanced T-odd P-odd electromagnetic moments in reflection assymmetric nuclei. V. Spevac, N. Auerbach, and V.V. Flambaum, Phys. Rev. C 56, 1357-1369 (1997).
103. Time invariance violating nuclear octupole moments. V.V. Flambaum, D. W. Murray and S.R. Orton, Phys. Rev. C 56, 2820-2829 (1997)
104. Statistical theory of finite Fermi systems based on the structure of chaotic eigenstates V.V. Flambaum, F.M. Izrailev, Phys. Rev E 56, 5144-5159 (1997).
105. Polarizabilities and parity non-conservation in the Cs atom and the limits on the deviation from the standard electroweak model. V.A. Dzuba, V.V. Flambaum, and O.P. Sushkov, Phys. Rev. A 56, R4357-R4360 (1997) .
106. Limits on the variation with Cosmic Time of Physical Constants. M.J. Drinkwater, J.K. Webb, J.D. Barrow, V.V. Flambaum. Mon. Not. Astron. Soc. 295, 457-462 (1998).
107. Interaction-driven equilibrium and statistical laws in small systems. The Cerium atom. V.V. Flambaum, A.A. Gribakina, G.F. Gribakin, I.V. Ponomarev, Phys. Rev. E57,4933-4942 (1998) .
108. Statistics of electromagnetic transitions as a signature of chaos in many-electron atoms. V.V. Flambaum, A.A. Gribakina, G.F. Gribakin , Phys. Rev. A58, 230-237 (1998).
109. *Statistical Approach to Finite Systems of Interacting Particles Based on the Structure of Chaotic Eigenstates*, V.V. Flambaum and F.M. Izrailev, Czechoslovak Journal of Physics 48, 830-837 (1998).
110. Using effective operators in calculating the hyperfine structure of atoms. V.A. Dzuba, V.V. Flambaum, M.G. Kozlov, C.G. Porsev. JETP 87, 885-890 (1998).
111. Space-time variation of physical constants and relativistic corrections in atoms. V. A. Dzuba, V.V. Flambaum, J. K. Webb , Phys. Rev. Lett. 82, 888-891, 1999.
112. Search for time variation of the fine structure constant. J. K. Webb , V.V. Flambaum, C.W. Churchill, M.J. Drinkwater, and J.D. Barrow, Phys. Rev. Lett., 82, 884-887, 1999.
113. Calculations of the relativistic effects in many-electron atoms and space-time variation of fundamental constants. V.A. Dzuba, V.V. Flambaum, and J.K. Webb. Phys. Rev. A59, 230 -237, 1999.
114. Spin-spin interaction and magnetic state of 2-D Wigner crystall. V.V. Flambaum, I.V. Ponomarev and O.P. Sushkov, Phys. Rev. B59, 4163-4169,1999.
115. Quantum chaos in multicharged ions and statistical approach to the calculation of electron-ion resonant radiative recombination. G.F. Gribakin, A.A. Gribakina, and V.V. Flambaum. Aust. J.Phys . 52, 443-57 (1999).
116. Quantum chaos in many-body systems: what can we learn from the Ce atom? V.V. Flambaum, A.A. Gribakina, G.F. Gribakin, and I.V. Ponomarev. Physica D131, 205-220 (1999).
117. Analitical calculation of cold atom scattering. V.V. Flambaum, G.F. Gribakin, and C. Harabati. Phys. Rev. A. 59, 1998-2005 (1999).
118. Radiative corrections increase tunneling probabily. V.V. Flambaum, V. G. Zelevinsky, Phys. Rev. Lett. 83, 3108-3111 (1999).
119. Enhancement factor for the electron electric dipole moment in francium and gold atoms. T.M.R. Byrnes, V.A. Dzuba, V.V. Flambaum , and D.W. Murray. Phys. Rev. A 59 ,3082-3083 (1999).
120. Calculation of the exchange constant in 2D Wigner liquid. V.V. Flambaum, I.V. Ponomarev and O.P. Sushkov. Aust. J. Phys. 52, 845-858 (1999).

121. Realistic model of correlated disorder and Anderson localization. V.V. Flambaum, V.V. Sokolov. Phys. Rev. B 60 , 4529-4231 (1999).
122. Dyons as a source of CP and time invariance violation: electric dipole moments and K-meson decays. D.W. Murray and V.V. Flambaum. J. Phys. G -Nucl.Part.Phys. 25, 2059-2069 (1999).
123. Enhancement of parity and time invariance violation in the radium atom. V.V. Flambaum. Phys. Rev. A60, R2611-2613 (1999).
124. Spin structure of impurity band in semiconductors in two and three-dimensional cases. . I.V. Ponomarev, V.V. Flambaum, and A.L. Efros. Phys. Rev. B 60, 5485-5496 (1999).
125. Calculation of exchange interaction in impurity band of two-dimensional semiconductors with out of plane impurities. I.V. Ponomarev, V.V. Flambaum, and A.L. Efros. Phys. Rev. B v. 60, p 15848-15857 (1999).
126. Calculation of positron bound state with the copper atom. V.A. Dzuba, V.V. Flambaum, G.F. Gribakin, C. Harabati. Phys. Rev. A 60, 3641-3647 (1999).
127. Excited eigenstates and strength functions for isolated systems of interacting particles. V.V. Flambaum, F.M. Izrailev, Phys. Rev. E 61, 2539-2542 (2000).
128. Atomic optical clocks and search for variation of the fine structure constant. V.A. Dzuba, V.V. Flambaum, Phys. Rev. A61, 034502 1-3 (2000).
129. Possible Mechanism of the fractional conductance quantization in a one-dimensional constriction. V.V. Flambaum, M. Yu. Kuchiev, Phys. Rev. B61, R7869-7872 (2000); cond-mat/9910415.
130. Calculation of parity and time invariance violation in the radium atom. V.A. Dzuba, V.V. Flambaum, J.S.M. Ginges, Phys. Rev. A61, 062509-1 - 062509-10 (2000).
131. Unusual statistics of interference effects in neutron scattering from compound nuclei. J. C. Berengut, V. V. Flambaum and G. F. Gribakin, Phys. Rev. C62, 024610 1-8 (2000).
132. Calculation of positron bound state with the silver and gold atom V.A. Dzuba, V.V. Flambaum, C. Harabati,, Phys. Rev. A62, 042504 1-7 (2000) .
133. Time dynamics in chaotic many-body systems: can chaos destroy a quantum computer. V.V. Flambaum, Aust. J. Phys. 53 (N4), 489-497 (2000); quant-ph/9911061.
134. Analytical correction to the WKB quantization condition for the highest levels in a molecular potential. C. Boisseau, E. Audouard, J. Vigue and V.V. Flambaum, Eur. Phys. J D 12 p 199 - 209 (2000)
135. Off-Diagonal Hyperfine Interaction and Parity Non-Conservation in Cesium. V.A. Dzuba, V.V. Flambaum, Phys. Rev. A, 62, 052101-1-6 (2000); physics/0005038.
136. Relativistic effects in Ni II and search for variation of the fine structure constant. V.A. Dzuba, V.V. Flambaum, M.T. Murphy and J.K. Webb. Phys. Rev. A. 63 042509-1 - 5 , (2001); astro-ph/0012422.
137. Atom made from charged elementary black hole. V.V. Flambaum, and J.C. Berengut, Phys. Rev., D63, 084010-1-9 (2001). gr-qc/0001022.
138. Calculations of parity nonconserving s-d transitions in Cs, Fr, Ba⁺, and Ra⁺ . V.A. Dzuba, V.V. Flambaum, and J.S.M. Ginges, Phys. Rev. A 63, 062101 (2001); physics/0101044 .
139. Entropy production and wave packet dynamics in the Fock space of closed chaotic many-body system. V.V. Flambaum, F. M. Izrailev, Phys. Rev. E64,036220-1-14 (2001); quant-ph/0103129.
140. Unconventional decay law for excited states in closed many-body systems. V.V. Flambaum, F. M. Izrailev, Phys. Rev. E64, 026124-1-4 (2001); quant-ph/0102088.

141. Further evidence for cosmological evolution of the fine structure constant. J.K. Webb, M.T. Murphy, V.V. Flambaum, V.A. Dzuba, J.D. Barrow, C.W. Churchill, J.X. Prochaska, and A.M. Wolfe, Phys. Rev. Lett. 87, 091301-1-4 (2001); astro-ph/0012539.
142. Possible evidence for a variable fine-structure constant from QSO absorption lines: motivations, analysis and results. M. T. Murphy, J. K. Webb, V. V. Flambaum, V. A. Dzuba, C. W. Churchill, J. X. Prochaska, J. D. Barrow and A. M. Wolfe, Mon. Not. R. Astron. Soc. 327, 1208 (2001); astro-ph/0012419.
143. Possible evidence for a variable fine-structure constant from QSO absorption lines: systematic errors. M.T. Murphy, J.K. Webb, V.V. Flambaum, C.W. Churchill, and J.X. Prochaska. Mon. Not. R. Astron. Soc. 327, 1223 (2001); astro-ph/0012420.
144. Further constraints on variation of the fine structure constant from alkali-doublet QSO absorption lines. M.T. Murphy, J.K. Webb, V.V. Flambaum, C.W. Churchill, J.X. Prochaska, and A.M. Wolfe. Mon. Not. R. Astron. Soc. 327, 1237 (2001); astro-ph/0012421.
145. Improved constraints on possible variation of physical constants from H I 21-cm and molecular QSO absorption lines. M.T. Murphy, J.K. Webb, V.V. Flambaum, M.J. Drinkwater, F. Combes and T. Wiklind. Mon. Not. R. Astron. Soc. 327, 1244 (2001); astro-ph/0101519.
146. Relativistic corrections in atoms and space-time variation of the fine structure constant. V.A. Dzuba, V.V. Flambaum, M.T. Murphy and J.K. Webb. Lecture Notes Phys. 570, 564 (2001).
147. "Colliding beam" enhancement mechanism of deuteron-deuteron fusion reaction in matter. B.L. Altshuler, V.V. Flambaum, M.Yu. Kuchiev and V.V. Zelevinsky. J. Phys. G: Nucl. Part. Phys. 27, 2345-2350 (2001).
148. Low-energy nuclear reactions boosted by collisions with environment (Carambole collisions). M.Yu. Kuchiev, B.L. Altshuler, and V.V. Flambaum. J. Phys. G: Nucl. Part. Phys. 28, 47-65 (2002).
149. Nuclear Schiff moment and time invariance violation in atoms. V.V. Flambaum and J.S.M. Ginges, Phys. Rev. A 65, 032113-1-9 (2002). nucl-th/0108007.
150. Limits on Cosmological variation of strong interaction and quark masses from Big Bang nucleosynthesis, cosmic, laboratory and Oklo data. V.V. Flambaum, E.V. Shuryak. Phys. Rev. D65, 103503-1-11 (2002); hep-ph/0201303.
151. Electron recombination with multicharged ions via chaotic many-electron states. V.V. Flambaum, A.A. Gribakina, G.F. Gribakin and C. Harabati. Phys. Rev. A66, 012713 (2002); physics/0106035.
152. The α -dependence of transition frequencies for ions Si II, Cr II, Fe II, and Zn II. V.A. Dzuba, V.V. Flambaum, M.G. Kozlov, and M. Marchenko. Phys. Rev. A66, 022501-1-8 (2002); physics/0112093.
153. A Catalogue of Damped Lyman Alpha Absorption Systems and Radio Flux Densities of the Background Quasars. S. J. Curran, J. K. Webb, M. T. Murphy, R. Bandiera, E. Corbelli and V. V. Flambaum. Publications of the Astronomical Society of Australia 19, 455-474 (2002). astro-ph/0206091.
154. High-precision calculation of parity nonconservation in cesium and test of the Standard Model. V.A. Dzuba, V.V. Flambaum, J.S.M. Ginges. Phys. Rev. D66, 076013 (2002). hep-ph/0204134.
155. Electric dipole moments of Hg, Xe, Rn, Ra, Pu and TlF induced by the nuclear Schiff moment and limits on time-reversal violating interactions. V.A. Dzuba, V.V. Flambaum, J.S.M. Ginges and M.G. Kozlov. Phys. Rev. A66, 012111 (2002). hep-ph/0203202.
156. Superconducting transition temperature of $MgB_2H_{0.03}$ is higher than that of MgB_2 . V.V. Flambaum, G.A. Stewart, G.J. Russel, J. Horvat, S.X. Dou, Physica C (superconductivity) 382, 213-216 (2002); cond-mat/0112301.

157. Influence of perturbations on the electron wave function inside the nucleus. M.Yu. Kuchiev, V.V. Flambaum. *J.Phys.B. : At. Mol.Opt.Phys.* 35 (2002) 4101-4112; hep-ph/0205012.
158. QED radiative corrections to parity nonconservation in heavy atoms. M.Yu. Kuchiev and V.V. Flambaum. *Phys. Rev. Lett.* 89, 283002, 2002 . hep-ph/0206124.
159. Does the fine structure constant vary? A third quasar absorption sample consistent with varying alpha. J.K. Webb, M.T.Murphy, V.V. Flambaum, S.G. Curran. *Astrophysics and space science (ApSS)* 283, 565-575, 2003. astro-ph/0210531. Proceedings of JENAM2002 workshop on The Cosmology of extra dimentions and varying fundamental constants.
160. Does the fine structure constant vary? A detailed investigation into systematic effects. M.T.Murphy, J.K. Webb, V.V. Flambaum, S.G. Curran. *Astrophysics and space science (ApSS)* 283, 577-582, 2003. astro-ph/0210532. Proceedings of JENAM2002 workshop on The Cosmology of extra dimentions and varying fundamental constants.
161. Limits on cosmological variation of quark masses and strong interaction. V.F. Dmitriev, V.V. Flambaum. *Phys. Rev. D*67, 063513 1-5 (2003); astro-ph/0209409.
162. Dependence of hadronic properties on quark masses and constraints on their cosmological variation. V.V. Flambaum, E.V. Shuryak. hep-ph/0212403, *Phys. Rev. D*67, 083507 1-7 (2003).
163. Comment on “Does the rapid appearance of life on earth suggest that life is common in the Universe”, V.V. Flambaum. astro-ph/0207229. *Astrobiology* 3(2),237-239 (2003).
164. Enhancement of nuclear Schiff moment and time reversal violation in atoms due to soft nuclear octupole vibrations. V.V. Flambaum, V.G. Zelevinsky. nucl-th/0208073. *Phys. Rev. C* 68, 035502 (2003).
165. Isotope shift calculation for atoms with one valence electron. J.C. Berengut, V.A. Dzuba, V.V. Flambaum. physics/0305068. *Phys. Rev. A.* 68, 022502 1-6 (2003).
166. Relativistic effects in Sr, Dy, YbII and YbIII and search for variation of the fine structure constant. V. A. Dzuba, V. V. Flambaum, M. V. Marchenko. physics/0305066 *Phys. Rev. A* 68, 022506 1-5 (2003).
167. Further evidence for a variable fine structure constant from Keck/HIRES QSO absorption spectra, M.T.Murphy, J.K. Webb, V.V. Flambaum. *Mon. Not. R. Astron. Soc.* 345, 609-638 (2003) ; astro-ph/0306483.
168. Cosmological variation of deuteron binding energy, strong interaction and quark masses from big bang nucleosynthesis. V.F. Dmitriev, V.V. Flambaum, J.K. Webb, *Phys. Rev. D*69, 063506 (2004); astro-ph/0310892.
169. Limits on temporal variation of fine structure constant, quark masses and strong interaction from atomic clock experiments. V.V. Flambaum, physics/0309107. Accepted to *Phys. Rev. D*. Published as a part of a longer paper *Phys. Rev. D*69, 115006 (2004).
170. Limits on temporal variation of fine structure constant, quark masses and strong interaction from quasar absorption spectra and atomic clock experiments. V.V. Flambaum, D.B. Leinweber, A.W. Thomas, R.D. Young, hep-ph/0402098. *Phys. Rev. D*69, 115006 (2004).
171. Configuration interaction calculation for the isotope shift in Mg I. J.C. Berengut, V.A.Dzuba, V.V. Flambaum, M.G. Kozlov. physics/0312137. *Phys. Rev. A*69, 044102 (2004).
172. Scattering of low energy scalar particles by a black hole. M.Yu. Kuchiev, V.V. Flambaum; gr-qc/0312056. *Phys. Rev. D*70, 044022 1-6 (2004).
173. Relativistic effects in two valence electron atoms and ions and the search for variation of the fine structure constant. E. J. Angstmann, V. A. Dzuba, and V. V. Flambaum physics/0404042. *Phys. Rev. A*70, 014102 1-4, (2004).

174. Cosmological variation of the fine structure constant versus a new interaction. E.J. Angstmann, V.V. Flambaum, S.G. Karshenboim. physics/0403009; astro-ph/0407011; Phys. Rev. A. 70, 044104 (2004).
175. Space-time variation of the fine structure constant and evolution of isotope abundances. M. G. Kozlov, V. A. Korol, J. C. Berengut, V. A. Dzuba, V. V. Flambaum, Phys. Rev. A70, 062108 (2004); astro-ph/0407579.
176. The α -dependence of transition frequencies for some ions of Ti, Mn, Na, C, and O, and search for variation of the fine structure constant. J.C. Berengut, V.A. Dzuba, V.V. Flambaum, and M.V. Marchenko. physics/0404008; Phys. Rev. A70, 064101 (2004).
177. Exponential enhancement of nuclear reactions in condensed matter environment. M.Yu. Kuchiev, B.L. Altshuler, V.V. Flambaum; nucl-th/0312035, Phys. Rev. C70,047601 (2004);C71,029901(2005).
178. Quantum tunneling of a complex system: effects of a finite size and intrinsic structure. V.V. Flambaum, V.G. Zelevinsky, nucl-th/0412012; J. Phys. G: Nucl. Part. Phys. 31 (2005) 355-360.
179. Wavelength calibration of the C I line at 94.5 nm for comparison with quasar data. I. Labasan, E. Reinhold, W. Ubach, V.V. Flambaum, Phys. Rev. A 71, 040501 (R) 1-3 (2005).
180. Search for cosmological variation of the fine structure constant using relativistic energy shifts in Ge II, Sn II, and Pb II. V.A. Dzuba, V.V. Flambaum. astro-ph/0501454. Phys. Rev. A71,052509 (2005).
181. Limits on variations in fundamental constants from 21-cm and ultraviolet quasar absorption lines. P. Tzanavaris, J.K. Webb, M.T. Murphy, V.V. Flambaum, and S.J. Curran. astro-ph/0412649. Phys. Rev. Lett. 95 , 041301 , 2005.
182. Relativistic corrections to the nuclear Schiff moment V.F.Dmitriev, and V.V. Flambaum, nucl-th/0503040, Phys. Rev. C71, 068501 , 2005.
183. Fine-structure anomalies and search for variation of the fine-structure constant in laboratory experiments. V. A. Dzuba and V. V. Flambaum, Phys. Rev. A 72, 052514 (2005).
184. Radiative potential and calculations of QED radiative corrections to energy levels and electromagnetic amplitudes in many-electron atoms V. V. Flambaum and J. S. M. Ginges, physics/0507067, Phys. Rev. A 72, 052115 (2005).
185. Parity nonconservation in atomic Zeeman transitions. E. J. Angstmann, T. H. Dinh, and V. V. Flambaum, physics/0508038, Phys. Rev. A 72, 052108 (2005)
186. Calculation of relativistic and isotope shifts in Mg I J. C. Berengut, V. V. Flambaum, and M. G. Kozlov, physics/0509253, Phys. Rev. A 72, 044501 (2005)
187. Sigma Terms of Light-Quark Hadrons V.V. Flambaum, A. Hoell, P. Jaikumar, C.D. Roberts and S.V. Wright nucl-th/0510075, Few Body Systems 38 (2006) pp. 31-51.
188. Breit Interaction and Parity Non-conservation in Many-Electron Atoms, V. A. Dzuba, V. V. Flambaum, and M. S. Safronova, Phys. Rev. A 73, 022112 (2006); physics/0512088
189. Calculation of isotope shift and relativistic shift in C I, C II, C III and C IV J. C. Berengut, V. V. Flambaum, M. G. Kozlov, physics/0509253, Phys. Rev. A 73, 012504 (2006).
190. A New Option for a Search for Alpha Variation: Narrow Transitions with Enhanced Sensitivity E. J. Angstmann, V. A. Dzuba, V. V. Flambaum, S. G. Karshenboim, A. Yu. Nevsky, physics/0511180, J. Phys. B. 39, 1937-1944 (2006)
191. Enhanced effect of temporal variation of the fine structure constant in diatomic molecules. V.V. Flambaum, Phys. Rev. A **73**, 034101 (2006); physics/0601034.

192. Coulomb problem for vector bosons in Standard Model. M.Yu.Kuchiev, V.V.Flambaum, hep-th/0511149. Mod. Phys. Lett. A, Vol. 21, No. 10 (2006) pp. 781-788.
193. Dependence of nuclear magnetic moments on quark masses and limits on temporal variation of fundamental constants from atomic clock experiments .V.V. Flambaum and A.F. Tedesco, Phys.Rev. C 73, 055501 1-9 (2006). nucl-th/0601050.
194. Possible evidence for “dark radiation” from Big Bang Nucleosynthesis Data, V.V. Flambaum and E.V. Shuryak, hep-th/0512038; Europhysics Letters, 74 (5), 813-816 (2006).
195. Coulomb problem for vector bosons, M.Yu.Kuchiev and V.V.Flambaum, hep-th/0512140, Phys. Rev. D.73, 093009 1-16 (2006).
196. Enhancement of variation of fundamental constants in ultracold atom and molecule systems near Feshbach resonances. Cheng Chin, V.V. Flambaum, Phys. Rev. Lett. 96, 230801 1-4 (2006); cond-mat/0603607.
197. Frequency shift of cesium clock transition due to blackbody radiation Angstmann, E. J., Dzuba, V. A., Flambaum, V. V., physics/0606249; Phys. Rev. Lett. 97, 040802 1-4 (2006)..
198. Resonance reactions and enhancement of weak interactions in collisions of cold molecules. V.V. Flambaum and J. S. M. Ginges, cond-mat/0603639; Phys. Rev. A 74, 025601 1-4 (2006).
199. Frequency shift of hyperfine transitions due to blackbody radiation E. J. Angstmann, V. A. Dzuba and V. V. Flambaum, physics/0605163, Phys.Rev. A74, 023405 (2006).
200. Enhanced effect of temporal variation of the fine structure constant and strong interaction in ^{229}Th . V.V. Flambaum, physics/0604188. Phys. Rev. Lett. 97, 092502 1-3 (2006).
201. Nuclear Schiff moment in nuclei with soft octupole and quadrupole vibrations. N. Auerbach, V.F. Dmitriev, V.V. Flambaum, A. Lisetskiy, R.A. Sen'kov, V.G. Zelevinsky, nucl-th/0602051. Phys. Rev.C74, 025502 1-11 (2006).
202. "Is it possible to enhance the nuclear Schiff moment by nuclear collective modes?" N. Auerbach, V.F. Dmitriev, V.V. Flambaum, A. Lisetskiy, R.A. Sen'kov, V.G. Zelevinsky. accepted to "Physics of Atomic Nuclei" (Yadernaya Fizika, Russia); Proceedings of NSRT06- International Conference on Nuclear Structure and Related Topics, Dubna, June 13-17, 2006).
203. Probing variations in fundamental constants with radio and optical observations of quasar absorption lines. P. Tzanavaris, J.K. Webb, M.T. Murphy, V.V. Flambaum, S.J. Curran, Accepted to Mon.Not.R.Astron.Soc.; astro-ph/0610326.

Papers submitted for publication and LANL archive.

1. Time dependence of occupation numbers and thermalization time in closed chaotic many-body systems. V.V. Flambaum and F.M. Izrailev, quant-ph/0108109.
2. Parity and time reversal violating nuclear polarizability. V.V. Flambaum, J.S.M. Ginges, and G. Mititelu, nucl-th/0010100.
3. Calculation of parity nonconservation in cesium and possible deviation from the Standard Model. V.A. Dzuba, V.V. Flambaum, J.S.M. Ginges. hep-ph/0111019.
4. Molecular Bose-Einstein condensate as an amplifier of weak interactions. V.V. Flambaum, J.S.M. Ginges. cond-mat/0207627. Submitted to Phys. Rev. A.
5. Comment on "Black hole constrain varying constants" V.V. Flambaum. astro-ph/0208384.
6. Comment on "Radiative corrections and parity nonconservation in heavy atoms". M.Yu. Kuchiev, V.V. Flambaum. hep-ph/0209052.

7. Time evolution of the fine structure constant. M.T.Murphy, J.K. Webb, V.V. Flambaum, S.G. Curran. astro-ph/0209488. Proceedings of XXII Physics in Collisions conference (PIC02), Stanford, USA, June 2002, 11 pages.
8. Limits on temporal variation of quark masses and strong interaction from atomic clock experiments. V.V. Flambaum, physics/0302015.
9. Atomic Clocks and the Search for Variation of the Fine Structure Constant. E.J. Angstmann, V.A. Dzuba, V.V. Flambaum, physics/0407141. 14th International Conference on Vacuum Ultraviolet Radiation Physics VUV14.
10. Laboratory spectroscopy and the search for the space-time variation of the fine structure constant. J.C. Berengut, V.A. Dzuba, V.V. Flambaum, M.G. Kozlov, M.V. Marchenko, M.T. Murphy, J.K. Webb, physics/0408017. 14th International Conference on Vacuum Ultraviolet Radiation Physics VUV14.
11. Reflection on event horizon and escape of particles from confinement inside black holes. M.Yu.Kuchiev, V.V.Flambaum, gr-qc/0407077.
12. Tunneling into black hole, escape from black hole, reflection from horizon and pair creation. V.V.Flambaum, gr-qc/0408013.
13. Causality condition and reflection on event horizon Authors: M.Yu.Kuchiev, V.V.Flambaum, gr-qc/0502117.
14. Enhancement of nuclear Schiff moments and time reversal violation in atoms due to combination of soft nuclear octupole and quadrupole vibrations, A. F. Lisetskiy, V.V. Flambaum, V.G. Zelevinsky. nucl-th/0505073.
15. Molecular Bose-Einstein condensates, resonance chemistry, and enhancement of weak interactions, V.V. Flambaum, J.S.M. Ginges, cond-mat/0603639.
16. When renormalizability is not sufficient: Coulomb problem for vector bosons. V.V. Flambaum, M.Yu. Kuchiev, submitted to Phys. Rev. Lett, hep-ph/0609194.
17. Calculation of energy levels and transition amplitudes for barium and radium. V. A. Dzuba, V. V. Flambaum physics/0610119 , submitted to J. Phys. B.
18. Revisiting VLT/UVES constraints on a varying fine structure constant. M.T. Murphy, J.K. Webb, V.V. Flambaum. astro-ph/0611080, Proceeding of conference on precise spectroscopy, Aviero.

1. Parity nonconservation in the interaction of neutrons with heavy nuclei. O.P. Sushkov, V.V. Flambaum. 16 LINP winter school proceedings, 1981, p.200-229, Usp.Fiz. Nauk. 136 (1), 3, 1982. Sov. Phys. Usp. 25, 1 (1982).
2. Enhancement of parity and time invariance violating effects in compound nuclei. V. V. Flambaum and G. F. Gribakin, Progress in Particle and Nuclear Physics **35**, 423 (1995).
3. The summation of the dominating diagrams in many-body perturbation theory. V. A. Dzuba, V. V. Flambaum, and W. A. King, Aust. J. Phys., **49**,231-246(1996).
4. Discovery of electromagnetic moment violating fundamental symmetries - nuclear anapole moment. V. V. Flambaum and D. W. Murray, Australian and New Zeland Physicist, May-June, 1997.
5. Statistical theory of finite Fermi systems with chaotic excited eigenstates. V.V. Flambaum and G.F. Gribakin. Philosophical Magazine B80, 2143-2173 (2000). (V.V. Flambaum, Lectures at the ANU School "Classical and Quantum Chaos", Canberra, 1998)

6. Does the fine structure constant vary with time and distance? V.V. Flambaum. *Mathematical Sciences* (in Japanese), 465, 18-23 (2002).
7. Radiative corrections to parity-non-conservation in atoms M.Yu.Kuchiev, V.V.Flambaum. hep-ph/0305053. *J.Phys.B.* 36, R191 (2003).
8. Violation of fundamental symmetries in atoms and tests of unification theories of elementary particles. J.S.M. Ginges, V.V. Flambaum. *Phys. Rep* 397, issue 2 (July 2004) pp. 63-154; physics/0309054.
9. S. Karshenboim, V.V Flambaum, E. Peik,in *Atomic, Molecular and Optical Physics Handbook*, Ch. 30, pp455-463: Atomic clocks and constraints on variation of fundamental constants. (Ed. G.W.F. Drake, Springer 2005). physics/0410074.

Invited talks published in conference proceeding

1. T- and P-odd nuclear moments. V.V. Flambaum. USSR atomic conference, Uzhgorod, 1985. Published in "Correlation and relativistic effects in atoms and ions", (Moscow, 1985), p.556; Preprint INP 85-113, 1985.
2. Calculation of energy levels of superheavy elements E 113 and E 114+. V.A. Dzuba, V.V. Flambaum, O.P. Sushkov. USSR atomic conference, Uzhgorod, 1985. Published in "Correlation and relativistic effects in atoms and ions" (Moscow, 1985), p.90.
3. Parity nonconservation in neutron reactions with heavy nuclei. V.V. Flambaum, O.P. Sushkov. In "Modern developments in nuclear physics" (Proceedings), Ed. O.P. Sushkov (World Scientific, Singapore, 1987), p.535.
4. T- and P-odd nuclear moments. V.V. Flambaum. In "Modern developments in nuclear physics" (Proceedings), Ed. O.P. Sushkov (World Scientific, Singapore, 1987),p.556.
5. Screening of residual Coulomb interaction and structure of many-body perturbation theory in heavy atoms. V.A. Dzuba, V.V. Flambaum, P.G. Silvestrov, and O.P. Sushkov in "Relativistic Quantum Electrodynamics and Weak Interaction Effects in Atoms." AIP conference proceedings v. 189, p.254-264 (1989). Editors: W. Johnson, P. Mohr, J. Sucher.
6. Nonlinear dynamics of ultra-cold gas. V.V.Flambaum and E.A.Kuznetsov, NATO Workshop "Singularities in Fluids, Optics, and Plasma", Proceedings (1992).
7. Dynamical enhancement of weak interactions and Quantum Chaos. V. V. Flambaum, Proc. 85th Nobel Symposium (World Scientific, 1993), 198–207.
8. Interaction between slow positrons and atoms. V. A. Dzuba, V. V. Flambaum, W. A. King, B. Miller, and O. P. Sushkov, Proc. 85th Nobel Symposium (World Scientific, 1993), 248–251.
9. Matrix elements between compound states. V. V. Flambaum, Proc. Int. Workshop "Time Reversal Invariance and Parity violation in neutron reactions", Dubna, 1993, pp.39-45 (Editors: C.R. Gould , J.D. Bowman , Yu.P. Popov. World Scientific, 1994).
10. Chaos, correlations and transition amplitudes in compound states. V. V. Flambaum, Proc. Int. Workshop "Parity and Time Reversal violation in compound nuclear states and related topics", Trento, 1995, pp.41-64 (Editors N. F. Auerbach, J.D.Bowman. World Scientific, 1996).
11. Nuclear anapole moment and tests of the standard model. V. V. Flambaum, in *Atomic Physics 16* (Proc. 16th International Conference on Atomic Physics, 1998), Eds. W.E. Baylis, G.W.F. Drake , AIP conference proceedings 477 (AIP 1999), pp. 14-28.
12. V.V. Flambaum, D.W. Murray *The nuclear anapole moment*, Proceedings of APCTP Workshop on Astro-Hadron Physics, October 25-31, 1997, Seoul. Properties of Hadron matter. (Editors G.E. Brown, C.-H. Lee, H.K. Lee, D.-P. Min, World Scientific, 1999), pp.1-10.

13. Electrically charged magnetic monopoles as a source of time invariance violation and CP-violation: electric dipole moments and K-meson decays. V.V. Flambaum and D.W. Murray . Proc. workshop on CP-violation, Adelaide 1998 (World Scientific, Singapore).
14. Atomic theory and tests of the Standard Model in atomic Experiments. V.V. Flambaum. Proceedings of 3d international symposium "Symmetries in Subatomic Physics", AIP Conference Proceedings, v. 539, 2000. Editors X.-H. Guo, A.W. Thomas, A.G. Williams (Melville, New York).
15. Does the fine structure constant vary with time and distance? V.V. Flambaum. 17th International Conference in Atomic Physics, Florence, June (2000). Atomic Physics 17, AIP conference proceedings, V. 551, pp.86-99, Editors. Arimondo, De Natale, Inguscio, 2001.
16. Relativistic corrections in atoms and space-time variation of the fine structure constant. V.A. Dzuba, V.V. Flambaum, M.T. Murphy, J.K. Webb. The Hydrogen Atom: Precision Physics of Simple Atomic Systems, Vol. 570 of Lecture Notes in Physics, p.564 (2001). Springer-Verlag, Berlin, Germany. Editors S.G. Karshenboim, F.S. Pavone, G.F. Bassani, M. Inguscio, T.W. Hansch.
17. Constraining variation in the fine-structure constant, quark masses and the strong interaction. M.T. Murphy, V.V. Flambaum, J.K. Webb, V.V. Dzuba, J.X. Prochaska and A.M. Wolfe. ACFC seminar, Bad Honnef (2003) ; astro-ph/0310318. In: Astrophysics, Clocks and Fundamental Constants, ed. by E. Peik, S. Karshenboim (Springer, Berlin, Heidelberg, 2004). Lecture Notes in Phys, 648, 131 (2004).
18. Limits on temporal variation of fine structure constant, quark masses and strong interaction from atomic clock experiments. V.V. Flambaum, ICOLS03, 16th International Conference on Laser Spectroscopy, 13-18 July 2003, Palm Cove. In: Laser Spectroscopy, ed. by P. Hannaford, A. Sidorov, H. Bachor, K. Baldwin (World Scientific, New Jersey, London, Singapore, Shanghai, Taipei, Chennai, 2004) pp. 49-47. Eprint physics/0309107.
19. Variation of fundamental constants, V.V. Flambaum. ICAP 2006, 20th International Conference on Atomic Physics, 16-21 June, Innsbruck, Austria. Atomic Physics 20, AIP conference proceedings, V. , pp., Editors. H. Haefner, C. Roos, 2006. physics/0608261.
20. Many-body theory, weak interactions and test of unification models in atomic and nuclear phenomena. V.V. Flambaum. Lecture series on computer and computational Sciences, Volume 7B (Recent Progress in Computational Sciences and Engineering), pp.873-877, 2006. Refereed Proc. International Conference of Computational Methods in Science and Engineering, ICMSSE 2006. Editors T. Simos, G. Maroulis. Koninklijke Brill NV, Leiden, 2006.
21. Variation of fundamental constants from Big Bang to atomic clocks (theory and observations), V.V. Flambaum. Lecture series on computer and computational Sciences, Volume 7B (Recent Progress in Computational Sciences and Engineering), pp.878-880, 2006. Refereed Proc. International Conference of Computational Methods in Science and Engineering, ICMSSE 2006. Editors T. Simos, G. Maroulis. Koninklijke Brill NV, Leiden, 2006.

Recent papers published in conference proceeding.
